Career Objective

Computer Science and Engineering (Data Science) graduate and full-stack developer with hands-on experience in Python, JavaScript, SQL, React, Node.js, and Express.js. Experienced in developing AI-powered applications using Retrieval-Augmented Generation (RAG), LangGraph, LangChain, local LLMs, and agentic workflows. Strong foundation in software development, problem solving, data analytics, and building practical, user-focused applications. Seeking an entry-level Software Engineer, AI Engineer, Full-Stack Developer, or related technology role.

Education

AMC Engineering College, Bengaluru **2022 – 2026**

Bachelor of Engineering (B.E.) in Computer Science and Engineering (Data Science) *CGPA: 8.34/10*

Experience

QSpiders, Bengaluru **Jan 2026 – May 2026**

Full Stack Development Intern

- Developed and tested simple web applications using Python, SQL, HTML, CSS, and Django fundamentals.
- Built mini projects including a calculator to strengthen Python programming, logical thinking, and problem-solving skills.
- Created responsive web pages using HTML and CSS and practiced SQL for database tables, data storage, and basic queries.
- Worked with Django project structure, URLs, views, and templates while debugging and testing applications to resolve basic functionality issues.

Technical Skills

- **Programming Languages**: Python, JavaScript, SQL
- **Frontend Development**: React, HTML5, CSS3, Bootstrap, Tailwind CSS, EJS, jQuery
- **Backend Development**: Node.js, Express.js, Django, REST APIs, Axios
- **AI / Machine Learning / LLM**: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Agentic AI, smolagents, Ollama, LLMs, Prompt Engineering
- **Data Science and Analytics**: Pandas, NumPy, Matplotlib, Seaborn, Power BI, MS Excel, Jupyter Notebook
- **Databases**: MySQL, PostgreSQL, SQLite, ChromaDB
- **Developer Tools**: Git, GitHub, VS Code, PyCharm, Postman, Streamlit, Gradio
- **Core Concepts**: Object-Oriented Programming (OOP), API Integration, Operating System, Database Management System (DBMS), Computer Networks, Data Analysis, Analytical Thinking, Problem Solving

Projects

StudyLens AI | *Python, FastAPI, Ollama, SQLite, Bootstrap* |

- Developed an AI-powered learning application that transforms educational content into structured study resources including summaries, study notes, multiple-choice quizzes, and interactive question-answering.
- Implemented a FastAPI backend with local LLM inference, transcript processing, SQLite persistence, and web-based research capabilities to generate contextual and source-grounded learning content.
- Designed a responsive web interface integrating AI workflows for content processing, quiz generation, and conversational study assistance, demonstrating practical application of Generative AI and full-stack development.

Agentic RAG PDF Chat | *LangGraph, LlamaIndex, ChromaDB, PyMuPDF, Ollama, Streamlit* |

- Built a fully local Retrieval-Augmented Generation (RAG) application for question answering over PDF documents using LangGraph, LlamaIndex, ChromaDB, PyMuPDF, Ollama, and Streamlit.
- Implemented agentic workflows for query rewriting, document retrieval, relevance evaluation, answer generation, validation, confidence scoring, and automatic retry to improve response grounding.
- Developed citation-aware responses that connect generated answers to relevant document sources, combining vector retrieval, agent orchestration, document processing, and local LLM inference.

HR Analytics Dashboard | *Power BI, Microsoft Excel* |

- Analyzed HR data using Microsoft Excel to explore employee metrics and identify workforce trends across relevant HR categories.
- Prepared and organized employee data in Excel to support accurate analysis and clear reporting of HR metrics.
- Developed an interactive Power BI dashboard to visualize HR metrics and present workforce insights through charts, KPI indicators, and data-driven reports.

Additional Information

- **Certifications**: NPTEL – Python for Data Science; NPTEL – Machine Learning and Deep Learning – Fundamentals and Applications; GeeksforGeeks – MERN Full Stack Development; Hugging Face – Fundamentals of Agents
- **Languages**: English, Kannada, Hindi
- **Achievements and Activities**: Participated in department-level hackathons and technical events at AMC Engineering College in 2024 and 2025; secured 2nd and 3rd place in Mime competitions at SSSC in 2020 and 2019; received a Distinction Award during Pre-University Course.
- **Interests**: Cricket, Badminton, Cooking
